

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. I was receiving many calls a day which was on average about 25 a week that were from solicitors. I work third shift and don't like to turn my phone off in case an emergency may arise, but I had no choice if I wished to get any sleep during the day. After I signed up for the Telephone Privacy protections my calls went down to the minimum (only people I wished to talk to were calling me). If I am interested in receiving any new services, etc. I would initiate the interest. I have yet to sign up for any services that I was contacted with by phone. Thanks for your time and listening to my concerns.

Sincerely,  
Chris Hunter
